PROFESSIONAL SUMMARY

Analytical and data-driven Computer Engineering student specializing in Machine Learning engineering pipelines. Possesses strong mathematical foundations in linear regression, optimization algorithms, and exploratory data analysis. Adept at building, training, evaluating, and deploying predictive statistical models using the Python ecosystem. Proven capacity to bridge backend scripting with intelligent ML workflows to solve algorithmic problems.

ACADEMIC & TECHNICAL PROJECTS

End-to-End Stock Price Prediction & Inference Engine June 2025 – Present
Machine Learning Focus (Python, Scikit-Learn, Pandas, NumPy)

- Developed a predictive model using Linear Regression to estimate equity price movements based on historical market trends and pricing signals.
- Designed robust pre-processing pipelines utilizing Pandas for imputation, outlier detection, data normalization, and feature scaling across extensive multi-year timeseries datasets.
- Evaluated model accuracy utilizing R-squared, Mean Squared Error (MSE), and Mean Absolute Error (MAE) metrics to minimize forecasting variances.

Human-Computer Interaction (HCI) Task Optimizer January 2026
Core Development Focus (Python, SQLite, Statistics)

- Designed and executed a responsive application aimed at studying user interaction latencies and improving scheduling workflows.
- Integrated descriptive analytics dashboards to analyze structured interaction logs committed directly onto local relational storage databases.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering 2023 – 2027
(Expected)

K.B.P. College of Engineering (KBPCOES)

Core Domain Focus: Theory of Computation, Human-Computer Interaction, Business Communication, Probability & Mathematical Statistics, Data Structures & Design Patterns.

ML STACKS & SKILLS

DATA SCIENCE STACK

Python, NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn

CORE DEVELOPMENT

Java, C++, SQL (MySQL, SQLite), Git, GitHub

ML CONCEPTS

Supervised Learning, Linear/Logistic Regression, Feature Engineering, Model Evaluation, Data Cleaning

CLOUD DEPLOYMENT

AWS Cloud Practitioner Foundations, Cloud Eco-tooling

COMPETENCIES

- Data Pipelines & ETL
- Statistical Inference
- Predictive Modeling
- Algorithm Design

CERTIFICATIONS

Python for Data Science

Advanced Predictive Modeling Track

AWS Academy Graduate

Cloud Computing Foundations

SOFT SKILLS

- Analytical Problem Solving
- Technical Documentation
- Team Leadership & PR
- Presentation Delivery

LEADERSHIP & EXTRACURRICULARS

- **Vice President – Sakai YIN College Council:** Directed student public relations and managed campaign deployment strategies, organizing strategic group alignments across institutional levels.
- **Technical Presentation:** Published and presented formal coursework reviews on removing communication barriers across structured development team topologies.
