PROFESSIONAL SUMMARY

Detail-oriented Engineering graduate and aspiring Software Developer with a solid foundation in algorithmic thinking, data structures, and object-oriented paradigms. Hands-on experience developing predictive web applications using Python and machine learning libraries. Demonstrated ability to translate complex logic into functional, responsive software while maintaining clean documentation and high coding standards.

KEY PROJECTS

Stock Price Prediction Platform June 2025 – Present
Personal Project (Python, Scikit-Learn, Pandas)

- Engineered an end-to-end predictive analysis tool utilizing Linear Regression models to evaluate and chart historical equity market behaviors.
- Implemented rigorous data cleaning and feature engineering pipelines processing over 5 years of daily historical stock market metrics.
- Designed a clean command-line and visualization interface, presenting accurate future price trends and variance metrics to users.

Interactive Task & Schedule Management Tool January 2026
Academic Project (Python, SQLite)

- Developed a multi-threaded scheduling application optimized for human-computer interaction flow and error resilience.
- Designed and executed normalized relational database schemas to safely commit transactional user records.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering 2023 – 2027 (Expected)
K.B.P. College of Engineering (KBPCOES)

Relevant Coursework: Theory of Computation, Human-Computer Interaction, Business Communication, Object-Oriented Programming, Data Structures & Algorithms.

ACADEMIC ACHIEVEMENTS & LEADERSHIP

- **Vice President Elect (Sakal YIN Council):** Spearheaded promotional outreach, communication strategies, and digital visual assets for student governance positioning across the university campus.
- **Technical Presentations:** Successfully structured and delivered comprehensive analyses on mitigation mechanics for organizational Communication Barriers.

TECHNICAL SKILLS

LANGUAGES
Python, Core Java, C++, SQL, HTML5, CSS3

LIBRARIES & FRAMEWORKS
Pandas, NumPy, Scikit-Learn, Matplotlib

DATABASES & TOOLS
MySQL, SQLite, Git, GitHub, VS Code

CLOUD ECOSYSTEMS
AWS Foundations, Infrastructure Basics

CORE FOCUS AREAS

- Data Analysis & Modeling
- Software Architectures
- Relational Databases
- User Centric UI/UX Flow

CERTIFICATIONS

AWS Academy Graduate
Cloud Foundations Track
Python for Data Science
Advanced Programming Certification

SOFT SKILLS

- Clear Oral & Written Communication
- Cross-Functional Group Collaboration
- Structured Analytical Problem Solving
- Fast Adaptation to Technical Stacks
